

System Restoration and Reliability Training Working Group (SRRTWG) CHARTER

Mission Statement:

Provide a forum to discuss System Operator Training, Resiliency, Emergency Preparedness and Power System Restoration. Advise MISO and its stakeholders on Reliability risks and mitigation of risks through training.

Deliverables:

- Identification and development of training activities to assist MISO and its members to ensure reliable operations of the Bulk Electric System (BES).
- Provide a forum for MISO members to discuss training topics and other relevant risks associated with System Operator training.
- Facilitate continuing education of trainers and System Operators within MISO and MISO Member Companies.
- Provide technical expertise in the development and coordination of power system restoration philosophy, plans, and strategies necessary to support Transmission Operator, Balancing Authority, and Reliability Coordinator requirements to reasonably ensure compliance with NERC and Regional specific Reliability Standards.
- Assist in the facilitation of exercises for emergency preparedness and power system restoration plans within the MISO Reliability Footprint. Develop, monitor, and evaluate the various emergency preparedness and system restoration drills.
- Review Event Analysis Lessons Learned, system events, and other discovered near misses to assist in the validation of all emergency procedures for MISO and MISO Member Companies.

Reports to:

Reliability Subcommittee (RSC)

Expected Meeting Time, Frequency & Location:

The meetings of the SRRTWG will be held on an as needed basis and are open to all interested Stakeholders. These meetings will be held at MISO facilities, by conference call, or elsewhere as needed. SRRTWG will meet a minimum of four times per year.

Quorum Requirements:

None

Voting Methods:

Any votes will be conducted by straight voting (one vote per eligible Voting Member). All voting shall be in accordance with the Stakeholder Governance Guide. (Policy Document: Section 3 and 7.3) In addition, entities for which MISO is providing reliability services under contract or Module F of the Tariff will be allowed to vote on items included in their services contract.

Requested Subject Matter Experts

SRRTWG draws upon the collective expertise of Stakeholders that elect to participate together with qualified MISO staff.

Sunset Provisions:

SRRTWG may retire based upon the determination that the assigned task and objectives have been completed or based on the justifications listed in 102.5.5 of Governance Guide Procedure Document.

Additional Requirements:

Responsibilities:

The SRRTWG is responsible to monitor applicable NERC and Regional Entity Reliability Standards for any changes that might affect the MISO and MISO entities, and provide assistance in maintaining MISO Emergency Operating Plans (EOP), including but not limited to the MISO System Restoration Plan. The group will review MISO's plans for transmission emergencies, energy emergencies, and load shedding for consistency with applicable NERC and Regional Entity Standards.
