

Grid Fundamentals

Virtual

February 22 and 23, 2022

1:00–5:00 p.m. MT

This course is hosted in two sequential sessions, offering a comprehensive explanation of how the electric power system works, how it is managed, and why. We will review the technology, operation, and markets of a modern reliable power grid. Environmental issues and regulations that affect the electric power system will also be discussed.

Class Topics

- Day One
 - Introduction to WECC
 - Electricity Basics
 - The Interconnected Power System
- Day Two
 - System Operations
 - Regulation
 - Environment

Who Should Attend?

- Anyone new to the electric utility business
- Environmentalists
- Policymakers
- Legal personnel
- Managers/supervisors/executives
- Anyone who is looking for a broader view of the grid
